We didn't set out to make history or change the industry. It just happened.

BalloonHQ has its origin in 1992. A young programmer was assigned the task of finding a means to share information over the Internet. Something called the World Wide Web turned up during his search - it looked like the ideal way to share information via computer. The next task - find a subject, and try it out. At that moment, the spark was lit, and BalloonHQ was born. BalloonHQ - the first place where balloon professionals around the world could connect to share and learn.
